

Symmetry

Staffing Vendor Management System™

FEATURES & BENEFITS

- Automate the entire process of working with outside staffing agencies and reach hundreds of candidates instantly
- Access supplemental staff's credentials on-line and agencies are responsible for updates, completion and accuracy
- Pay via a single, consolidated invoice for all agencies or use reverse invoicing to simplify the reconciliation process
- 100% Vendor Neutral

"Bergen Regional Medical Center recently launched the Symmetry Vendor Management Solution and we were quickly able to realize measurable efficiencies in procuring and confirming supplemental staffing agency needs, electronic credentials compliance and invoice automation. The system allows us to capture and manage financial and nursing data metrics through automation that previously required more time consuming manual effort. The Symmetry Vendor Management System has helped us run our Medical Center more confidently and effectively."

Mary Anne Marra, Chief Nurse Executive
Bergen Regional Medical Center

SymmetryVMS™

It's a proven fact; for healthcare providers to ensure the safest, most cost-effective and efficient staffing levels, they ultimately rely on assistance from outside staffing agencies. Whether it's filling in for leaves of absence, vacations, EHR implementations, sudden increases in census or acuity swings, your staffing needs are in constant flux and your ability to communicate quickly and directly with staffing agencies to meet those needs is critical. Add in the additional concerns of JCAHO compliance, credentials management, and screening requirements for outside agency staff and the need for an easy-to-use, automated supplemental staffing solution becomes vividly apparent.

SymmetryVMS™ automates the entire process of working with your staffing vendors and simplifies not only the acquisition of agency staff, it allows you to easily manage the credentialing, scheduling, and often tedious process of invoicing and reconciliation. Symmetry VMS™ was designed by experienced industry experts who know where the problems lie, resulting in a superior solution that is both simple to use and highly effective.
